

You must keep the Wisconsin No Call Law as it is in order for our home lives to be able to maintain the peace and relaxation we have finally won from the telemarketers. We could not get through a dinner without a telemarketer ringing the phone, and even if we did not answer it, the constant ringing is disrupting. It is a sad situation when we have to be afraid to answer our phones at all just in order to avoid receiving 2-3 annoying calls per night from someone pushing something we have no interest in. It is even worse for elderly people, like my Mother, who have a hard time saying no to these pushy salespeople, because they are intimidated or are afraid of being rude by hanging up on them. Before the "No Call List", my Mother got to the point where she would NEVER answer her phone. We should not have to spend money on Caller I.D. just to protect ourselves from our phones that are costing us too much already! Help us keep our sanity and keep our law as it is!
